

Approximated Monthly Living Expense Budget

This Living Expense Budget has been designed to encourage you, the student, to pay close attention to your cost of living expenses when you are contemplating seeking employment opportunities and making career choices. In most cases your personal obligations can dictate the type of opportunity you will be able to accept.

Please take a moment to thoroughly assess how you will proceed with your career choices. Career Services can assist you with various opportunities for your consideration, but it is entirely your responsibility to make a choice that is right for you. These choices should be made following a close assessment of your personal financial status, technical skills/creative abilities and field choices. No one student's situation is alike, so therefore, we advise you to please take the time to assess your individual financial status prior to beginning your job search process.

In addition to helping you with your desires in terms of career choices, this budget will further help you and Career Services define the type of opportunities that might be more appropriate for you at this time. To help you get started we have provided you with a few expense categories.
